

# SDS For Decalcifying Reagent Catalog # 526A

Medical Chemical Corp. 19430 Van Ness Ave. Torrance, CA 90501

Customer Service: Phone (310)787-6800

FAX (310)787-4464

CHEMTREC Emergency Response Telephone Number: (800)424-9300

Note: The CHEMTREC phone number is only for emergencies involving spills, leaks, fire, exposure or accident. Please direct all other inquiries to our customer service phone number.

#### Section I - Product Identification

An aqueous solution of formic acid, formaldehyde and methanol.

# **Section II - Hazards Identification**

Danger: Causes severe skin burns and eye damage. Wash thoroughly after handling. Wear protective clothing, eye and face protection. If swallowed, rinse mouth with water but do not induce vomiting. Immediately contact a poison control center. Remove contaminated clothing and wash before reuse. Rinse skin with water.

### **Safety Ratings**

Health: Hazardous Flammability: Slight Reactivity: None Contact: Slight

Recommended safety equipment: safety goggles, lab coat and proper gloves

Storage: General storage

NFPA Ratings

Health = 2 Flammability = 0 Reactivity = 0

# Potential Health Effects

Inhalation: Irritating to respiratory tract. May cause asthma like symptoms in sensitive individuals.

*Ingestion:* Can cause irritation and chemical burns to the mouth, throat, esophagus and stomach. Can also cause nausea, vomiting, diarrhea, etc.

Skin contact: May cause skin irritation or aggravation of existing dermatitis. May cause temporary discoloration of the skin.

Eye contact: Vapors may cause stinging sensation and tearing. Solution contact can cause corneal injury which can cause visual impairment if not dealt with immediately.

Aggravation of preexisting conditions: May aggravate preexisting asthma and other lung diseases.

#### Section III - Composition/Information on Components OSHA Pel ACGIH TLV Ingredients CAS# Other Limits % Formic acid 64-18-6 5 ppm (TWA) 5 ppm (TWA) 11% Formaldehyde 50-00-0 0.75 ppm (TWA) 0.3 ppm (CEIL) 2% Methanol 67-56-1 200 ppm (TWA) 250 ppm (STEL) 0.5%

# **Section IV - First Aid Measures**

Inhalation: Remove from source of exposure and get medical attention for any breathing difficulty.

*Ingestion:* Drink large quantities of fluids and call a physician immediately. Administer activated charcoal or other adsorbent if available.

Skin Contact: Wash affected area with soap and water. Get medical advice if irritation develops.

Eye Contact: Immediately flush thoroughly with running water for at least 15 minutes. Get immediate medical advice.

# **Section V - Fire Fighting Measures**

Flash Point (method used): Not applicable

Flammable Limits: Not applicable

Extinguishing Media: Dry chemical, carbon dioxide or alcohol type foam.

Special Fire Fighting Procedures: Use self-contained breathing apparatus and full protective clothing.

Unusual Fire And Explosion Hazards: Pyrolysis will release toxic compounds such as carbon monoxide and formaldehyde.

#### Section VI - Accidental Release Measures

Wear appropriate protective gear such as gloves, apron and protective eye wear. Absorb with a suitable absorbent (such as paper towels) and store in a suitable container for disposal. Large spills may be neutralized with formalin neutralizers.

# Section VII - Handling and Storage

Store in a closed container at controlled room temperature, 59 °F to 86 °F (15 °C to 30 °C).

# **Section VIII - Exposure Control/Personal Protection**

Airborne Exposure Limits: See section III.

*Ventilation System*: Use appropriate ventilation. Laboratory fume hoods or similar apparatus are recommended for handling formaldehyde solutions. When required, Refer to the ACGIH document, "Industrial Ventilation, a Manual of Recommended Practices" for details about ventilation.

Personal Respirator: Required if threshold limit value for formaldehyde is exceeded. In case of emergency, or when exposure levels are unknown, use a half face or full face respirator with organic vapor cartridges.

Skin protection: Chemical resistant gloves are recommended.

Eye Protection: Laboratory safety goggles, safety glasses or face shield are required.

People who regularly work with formaldehyde are required to have regular medical surveillance.

# **Section IX - Physical and Chemical Properties**

Boiling Point: 98 - 99 °C Specific Gravity: 1.03

Vapor pressure (mm Hg): 18 @ 20 °CEvaporation Rate (water = 1): 1Vapor Density (air = 1): 1Solubility In Water: Complete

Appearance and Odor: Clear colorless solution. Characteristic odors of formaldehyde and formic acid.

### Section X - Stability and Reactivity

Stability: Freezes at low temperature.

Hazardous Decomposition Products: Nothing unusual.

Hazardous polymerization: Will not occur.

Incompatibilities: Nothing unusual.

Conditions to avoid: Excessive cold/heat and light.

#### **Section XI - Toxicological Information**

*Toxicity:* The chronic toxicity of this product is unknown but may include sensitization in sensitive individuals. Formaldehyde is a known human carcinogen

Cancer lists

Formaldehyde yes no yes 2A  Methanol no no no none  Formic acid no no no none	<u>Ingredient</u>	Known Carcinogenicity?	NTP?	Anticipated?	IARC Category

Formic acid no no no nono	Methanol	no	no	no	none
Formic acid no no none	Formic acid	no	no	no	none

# **Section XII - Ecological Information**

Environmental Fate: Biodegradable

Environmental Toxicity: Formaldehyde is toxic to fish.

# **Section XIII - Disposal Considerations**

Incineration at a licensed chemical disposal facility is the preferred disposal method for formaldehyde. Because formaldehyde is a known human carcinogen, local and state governments often restrict the amount that may be flushed down the drain without neutralization. Neutralization may be achieved with glycine, bisulfite or ammonia. There are also proprietary products that are authorized for formaldehyde. Dispose of contents and container in accord with all applicable regulations.

# **Section XIV - Transportation Information**

Not regulated.
